132nd Annual Carlton County Fair Dedication Ramona Laveau

Ramona was the Laveau family Matriarch who built a long standing tradition of participation in the Carlton County Fair. She was known for her fierce drive when it came to three things: Family, Faith and Farming.

Ramona alongside her husband Alex farmed in northern Minnesota for over 30 years. They purchased their farm in Wrenshall in 1959 and started with a herd of 75 milking Holsteins. A couple years later, when they went into farming full time, they expanded the farm to have the capacity to milk 120 cows. Between milk cows and youngstock their herd grew to around 300 head. The Laveaus not only sold their milk to the creamery, but also sold their own unpasteurized milk, cheese and meat right on the farm.

Ramona raised her 10 children to share in her values. Ramona was the 4H club leader for her children and the family exhibited dairy cattle in the Carlton County Fair for many years. In more recent years, Ramona would attend the fair every year to watch her family show cattle, visit with fair goers and volunteer at the pro-life booth. Ramona's legacy continues with her children, grandchildren, and great grandchildren showing cattle and participating in 4-H annually at the Carlton County Fair.

LIVESTOCK

All Open Class Livestock Exhibitors are required to supply their own bedding & feeding supplies. Fair Veterinarian will be onsite during fair week. Animals are not to be taken into barns until the Barn Superintendent has officially opened the barn and is available to check in the animals.

No animals that are currently part of production outside of these areas will be allowed. Entry times for Division A through CC are specified in each Division. The right is reserved to close entries before that time. Please note the hour for closing entries. We urge ALL exhibitors to comply in order for the judging to be held on schedule. Call the superintendent of the division for stall information and locations.

THE DO'S and DONT'S IN PREPARING YOUR VEGETABLE EXHIBIT

SNAP BEANS: Harvest before constrictions appear between seeds, when seeds are about half grown. Ends of pods should not be broken off in picking. Pods should be uniform. Pods may be wiped clean, but not washed.

BEETS, CARROTS, PARSNIPS, RUTABAGAS: Root crops should be mature but not over grown, pithy or coarse in texture. Tops trimmed off 1 1/2 inches above crown. Side roots trimmed off but not the top root. Roots carefully washed but not scrubbed.

BROCCOLI: Heads should be dark or purplish green and compact. Avoid yellow flowers in head. Stems cut about 5 inches from top of head.

CABBAGE: Stems cut about 1/4 inch below the head. Remove blemished or broken leaves but care should be taken not to peel the heads too much. A few outside wrapper leaves are desirable. Specimens may be washed.

CAULIFLOWER: Heads should be white, compact, and free of small leaves and ricy texture. Stems cut so as to leave 4 to 6 leaves. Outer leaves trimmed to 1 to 2 inches above the white head. Use soft bristled brush to remove dirt from heads.

CELERY: Remove roots of stalk and trim butt to form a triangle or pyramid. Trim diseased and broken leaves on outside until color is uniform.

SWEET CORN: Select ears that are well filled out to the tip. Kernels should be milky and juicy. Remove outer husks but allow a short shank and the inner husks to remain.

CUCUMBERS: Pickling: select fruits 3 to 5 inches long. Specimens should be the same stage of maturity and uniform in size, shape and color. Slicers: select fruits that are straight and stems = 1/2", dark green, and 6 to 10 inches long. They should be uniform in size, shape and color.

KOHLRABI: Remove roots just below the ball. Remove all but the upper 4 to 6 leaves. Select specimens that are uniform, medium size, and not hard or woody. Skin should be easily punctured by thumbnail. They should be clean, but not washed.

ONIONS: Have specimens mature and thoroughly cured. The neck should be small. Do not peel to give slick appearance. Only such outer scales that are broken or discolored should be removed. Small basal roots should be left intact but trimmed to uniform length of 1/2 inch. Wipe or brush but do not wash.

POTATOES: Tubers should be uniform in size, color and shape. Washing is permitted but do not blemish the skin by scrubbing. Avoid specimens with defects or disease.

RHUBARB: Select specimens that are straight, uniform and unblemished. Stalks should be pulled from the plant, not cut. Trim the leaf blade to about one inch above the stalk.

SUMMER SQUASH: Select small to medium size fruits when the rind is soft and easily punctured with thumbnail. Leave about 1/2 inch of stem and wipe fruits clean.

WINTER SQUASH and PUMPKINS: Select mature specimens where the rind resists the pressure of the thumbnail. Fruits should be free of defects. Leave stem attached to the fruits.

SWISS CHARD: Select plants that are fresh, crisp and have bright green leaves. Trim off roots and trim butts to pyramid shape. Trim off diseased and broken leaves on the outside until the color is uniform.

TOMATOES: Select fruits that are uniform in size, shape and color. Fruits should be perfectly shaped and free of cracks or blemishes.
