134TH ANNUAL CARLTON COUNTY FAIR DEDICATION STEVE LOUCKS

We believe it is fair to say, when you think of the Carlton County Fair, you think of Steve Loucks. Steve has not missed a Carlton County Fair in over 60 years. His journey started with exhibiting different projects at the fair. While Steve continued to find projects through the fair he was quickly appointed to assisting with the auto racing program. When Ron Ham-mitt decided to step down from the racing program, he simply looked over at Steve and said "I think you got it from here," and this started Steve's dedication to the Carlton County Fair Board. Through the years Steve has been involved in many different projects including, the large renovation of the grandstands, installing over 100 camping sites, developing a storage program to help with funding ongoing improvement projects at the fair, and constructing many buildings throughout the grounds. Steve loves the fair so much that he moves his family here through the summer so they can all work every day with maintaining the grounds. The Carlton County Fair is proud to dedicate the 2025 Carlton County Fair to Steve Loucks.

THE DO'S and DONT'S IN PREPARING YOUR VEGETABLE EXHIBIT

SNAP BEANS: Harvest before constrictions appear between seeds, when seeds are about half grown. Ends of pods should not be broken off in picking. Pods should be uniform. Pods may be wiped clean, but not washed.

BEETS, CARROTS, PARSNIPS, RUTABAGAS: Root crops should be mature but not over grown, pithy or coarse in texture. Tops trimmed off 1 1/2 inches above crown. Side roots trimmed off but not the top root. Roots carefully washed but not scrubbed.

BROCCOLI: Heads should be dark or purplish green and compact. Avoid yellow flowers in head. Stems cut about 5 inches from top of head.

CABBAGE: Stems cut about 1/4 inch below the head. Remove blemished or broken leaves but care should be taken not to peel the heads too much. A few outside wrapper leaves are desirable. Specimens may be washed.

CAULIFLOWER: Heads should be white, compact, and free of small leaves and ricy texture. Stems cut so as to leave 4 to 6 leaves. Outer leaves trimmed to 1 to 2 inches above the white head. Use soft bristled brush to remove dirt from heads.

CELERY: Remove roots of stalk and trim butt to form a triangle or pyramid. Trim diseased and broken leaves on outside until color is uniform.

SWEET CORN: Select ears that are well filled out to the tip. Kernels should be milky and juicy. Remove outer husks but allow a short shank and the inner husks to remain.

CUCUMBERS: Pickling: select fruits 3 to 5 inches long. Specimens should be the same stage of maturity and uniform in size, shape and color. Slicers: select fruits that are straight and stems = 1/2", dark green, and 6 to 10 inches long. They should be uniform in size, shape and color.

KOHLRABI: Remove roots just below the ball. Remove all but the upper 4 to 6 leaves. Select specimens that are uniform, medium size, and not hard or woody. Skin should be easily punctured by thumbnail. They should be clean, but not washed.

ONIONS: Have specimens mature and thoroughly cured. The neck should be small. Do not peel to give slick appearance. Only such outer scales that are broken or discolored should be removed. Small basal roots should be left intact but trimmed to uniform length of 1/2 inch. Wipe or brush but do not wash.

POTATOES: Tubers should be uniform in size, color and shape. Washing is permitted but do not blemish the skin by scrubbing. Avoid specimens with defects or disease.

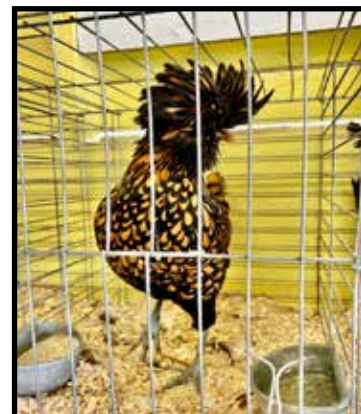

RHUBARB: Select specimens that are straight, uniform and unblemished. Stalks should be pulled from the plant, not cut. Trim the leaf blade to about one inch above the stalk.

SUMMER SQUASH: Select small to medium size fruits when the rind is soft and easily punctured with thumbnail. Leave about 1/2 inch of stem and wipe fruits clean.

WINTER SQUASH and PUMPKINS: Select mature specimens where the rind resists the pressure of the thumbnail. Fruits should be free of defects. Leave stem attached to the fruits.

SWISS CHARD: Select plants that are fresh, crisp and have bright green leaves. Trim off roots and trim butts to pyramid shape. Trim off diseased and broken leaves on the outside until the color is uniform.

TOMATOES: Select fruits that are uniform in size, shape and color. Fruits should be perfectly shaped and free of cracks or blemishes.
