# 135<sup>th</sup> Annual Carlton County Fair Dedication "The Schatz Girls"

The Carlton County Fair Board proudly dedicates the 135th Annual Carlton County Fair to "the Schatz Girls"

Katelynne, Jessica and Lynnsey have been a part of the Carlton County Fair for many years. They started as young girls who proudly entered their bunnies, baking and craft items for a chance at winning a ribbon or premium.

They had entries for many years and then moved on to work as volunteers with school in the Bomber Booth and other areas. Eventually they moved to paid positions as gate workers and all three of them ended up as Lead workers at the entry gates.

They might not be on the schedule for working gates anymore but they still show up every year willing to jump in and help. They are there behind the scenes helping their mom, Jodi, take entries, set up and take down the Hobby Craft division for the fair, and answer the call to help on those crazy Saturday rushes at the car gate. Now as they have found significant others they have managed to wrangle them into the fun as well, like it or not.

So...with great appreciation over the years, we dedicate the 2026 Carlton County Fair to Katelynne, Jessica and Lynnsey. Thank you for your years of service.

### THE DO'S and DONT'S IN PREPARING YOUR VEGETABLE EXHIBIT

**SNAP BEANS:** Harvest before constrictions appear between seeds, when seeds are about half grown. Ends of pods should not be broken off in picking. Pods should be uniform. Pods may be wiped clean, but not washed.

**BEETS, CARROTS, PARSNIPS, RUTABAGAS:** Root crops should be mature but not over grown, pithy or coarse in texture. Tops trimmed off 1 1/2 inches above crown. Side roots trimmed off but not the top root. Roots carefully washed but not scrubbed.

**BROCCOLI:** Heads should be dark or purplish green and compact. Avoid yellow flowers in head. Stems cut about 5 inches from top of head.

**CABBAGE:** Stems cut about 1/4 inch below the head. Remove blemished or broken leaves but care should be taken not to peel the heads too much. A few outside wrapper leaves are desirable. Specimens may be washed.

**CAULIFLOWER:** Heads should be white, compact, and free of small leaves and ricy texture. Stems cut so as to leave 4 to 6 leaves. Outer leaves trimmed to 1 to 2 inches above the white head. Use soft bristled brush to remove dirt from heads.

**CELERY:** Remove roots of stalk and trim butt to form a triangle or pyramid. Trim diseased and broken leaves on outside until color is uniform.

**SWEET CORN:** Select ears that are well filled out to the tip. Kernels should be milky and juicy. Remove outer husks but allow a short shank and the inner husks to remain.

**CUCUMBERS:** Pickling: select fruits 3 to 5 inches long. Specimens should be the same stage of maturity and uniform in size, shape and color. Slicers: select fruits that are straight and stems = 1/2", dark green, and 6 to 10 inches long. They should be uniform in size, shape and color.

**KOHLRABI:** Remove roots just below the ball. Remove all but the upper 4 to 6 leaves. Select specimens that are uniform, medium size, and not hard or woody. Skin should be easily punctured by thumbnail. They should be clean, but not washed.

**ONIONS:** Have specimens mature and thoroughly cured. The neck should be small. Do not peel to give slick appearance. Only such outer scales that are broken or discolored should be removed. Small basal roots should be left intact but trimmed to uniform length of 1/2 inch. Wipe or brush but do not wash.

**POTATOES:** Tubers should be uniform in size, color and shape. Washing is permitted but do not blemish the skin by scrubbing. Avoid specimens with defects or disease.

**RHUBARB:** Select specimens that are straight, uniform and unblemished. Stalks should be pulled from the plant, not cut. Trim the leaf blade to about one inch above the stalk.

**SUMMER SQUASH:** Select small to medium size fruits when the rind is soft and easily punctured with thumbnail. Leave about 1/2 inch of stem and wipe fruits clean.

**WINTER SQUASH and PUMPKINS:** Select mature specimens where the rind resists the pressure of the thumbnail. Fruits should be free of defects. Leave stem attached to the fruits.

**SWISS CHARD:** Select plants that are fresh, crisp and have bright green leaves. Trim off roots and trim butts to pyramid shape. Trim off diseased and broken leaves on the outside until the color is uniform.

**TOMATOES:** Select fruits that are uniform in size, shape and color. Fruits should be perfectly shaped and free of cracks or blemishes.
